The current NSPDP participants are to serve on a focus group for the Office of Nuclear Regulatory Research. The purpose of the focus group is to pilot test methodology and key messages associated with the State-of-the-Art Reactor Consequence Analysis (SOARCA) Project. The group's efforts will assist in qualitatively assessing the efficacy of SOARC.

Accordingly, we want to gather as many of the seven participants as possible in Arlington for a one-time, three-hour meeting. The facilitator for the meeting will be Dorothy Collins Andreas, a risk communications expert.

The target dates are the mornings of 09/29, 10/01, 10/06, and 10/08.

Please do a calendar search and let me know which date(s) will result in the most being able to participate. Also, we will need a conference room.
